## **AWARDS**

"Best Organic Artist," Hudson Valley Magazine, Oct. 2004  
"Haymes' assemblages ... three-dimensional wall hangings made from organic materials such as bones and tree branches ... have an arresting other-worldliness, their tactile compositions being familiar, yet strangely primeval. 'The heart of my work is the pull and tug between nature and technology,' he says, adding that his latest favorite medium is rust. 'It's partly the textures but also the palette of colors ... there are so many different kinds.'"
